

# 2013 Aviation Weather for Pilots

Six classes are planned for 2013 to help pilots of all levels better understand the atmosphere and aviation weather. Sessions include: theory and classroom lecture, sample flight-planning scenarios and aviation accident reviews where weather has been a causal factor.

Please join us for these informative sessions on the following dates below. All classes are held at Independence Aviation, Centennial Airport (KAPA) and run from 9:00 a.m. until noon.

February 16	Aviation Weather Fundamentals
April 20	Spring Weather Hazards
June 15	Summer Weather Hazards
August 24	Aviation Weather Decoded
October 19	Winter Weather Hazards
December 14	Mountain Weather Hazards

**To register for classes, call Independence Aviation 303.858.1600**
